5. Background

In February 2023, the Montserrat Parliament Building Project was approved as a candidate initiative within the CIPREG Programme, with a conceptual design prepared by the Public Works Department. A Project Delivery Committee was established, and key project documentation developed under the project management of the PMO. During 2023–2024 reporting, it became clear that, based on the spatial and functional requirements, the funding initially available would not fully cover the proposed scope. In response, the decision was made to procure additional design and estimating services to explore potential solutions and provide greater clarity on associated costs. This proactive step was intended to inform future investment requirements and support Cabinet and the Steering Committee in their decision-making.

Although the procurement process did not result in an award, the project was paused pending consideration of the CIPREG budget and alternative funding solutions. At a subsequent Steering Committee meeting, approval was granted to reallocate funds from the Parliament Building project to the Upgrade of the Cultural Centre project.

The current strategy focuses on delivering a renovation project to enhance the Montserrat Cultural Centre—the current venue for Montserrat's parliamentary proceedings. This approach not only strengthens the facilities available for legislative sittings but also revitalises an important cultural landmark and community hub. By modernising the Centre, the project will create a more attractive venue for a wider range of events, encourage greater community use, and generate increased revenue.

The Montserrat Cultural Centre is an iconic landmark of Montserrat, celebrated for its historical significance. Owned by the Government of Montserrat, with full responsibility for its upkeep, the Centre has long stood as a symbol of national pride. Over the years, it has grown beyond its original design to host a wider range of functions, including the Legislative Assembly. Having served the nation well, it now presents a timely opportunity for significant maintenance and upgrading, ensuring it is restored to modern, fit-for-purpose standards that reflect its stature and importance.

7. EVALUATION OF BIDS

The following evaluation criteria will be used to evaluate Bids received in response to this ITT. The Administrative Compliance will be applied before the remaining criteria and is either pass or fail, with failure meaning that bids will be deemed Non-compliant. Bidders must achieve a minimum of 65% of the technical score to be considered for award of contract.

EVALUATION CRITERIA	WEIGHTED SCORE %
Administrative Compliance	PASS/FAIL
The technical and cost criteria will be evaluated over a total of 100 %. Bidders are required to achieve at least a minimum of 65% of the technical score to qualify for consideration for contract award.	
Technical Assessment	
Warranty on Workmanship – twelve (12) months	5%
Project Methodology and Schedule of Works	15%
Delivery Time	15%
Experience	15%
Technical Specifications	15%
Financial Assessment	
Cost Proposal	35%
TOTAL	**100%**

7.1 Administrative Compliance (PASS/FAIL)

Bidders must submit all the documents requested in the Tender Checklist as specified in Section ten (10):

- Completed and Signed Respondent's Identification Details (Section 7)
- Completed and Signed Form of Tender (Section 8)
- Signed Anti-Collusion Statement (Section 9)
- Tax Compliance Certificate (if locally based)
- Warranty
- Project Methodology and Schedule of Works
- Delivery Time
- Technical Specifications
- Cost Proposal
- Completed Bill of Quantities

This is a PASS/FAIL criterion. If all the above requirements are fulfilled, then the bidder would move onto the next stage of the evaluation. If any of the above-mentioned items are not submitted, then the Tender would be deemed non-compliant and rejected.

7.2 Warranty (5%)

In the submission of their Tender, bidders are required to furnish a valid warranty for the workmanship of no less than twelve (12) months from handover/practical completion date. Ideally, the bidder should itemize each component, specifying the corresponding duration of warranty for each. Comprehensive information outlining the scope of warranty coverage applicable to the equipment and fixtures provided must be included. Bidders failing to incorporate the required warranty information will be disqualified.

7.3 Methodology (15%)

Bidders are asked to provide details on their operational methodology in explicit terms. Specifically, bidders must delineate whether the execution of the contracted job necessitates the presence of on-site technicians (specifying total number of crew members). In addition, bidders are required to furnish a comprehensive Gantt chart detailing the entire project lifecycle. This Gantt chart should outline the sequence of tasks, key milestones, and anticipated deliverables. The provision of such detailed information is deemed integral to the bid evaluation process and will be considered a material factor in the selection criteria. Failure to comply with this requirement may result in the disqualification of the bidder's submission. The percentage for this criterion will be calculated proportionately to similar submissions from other tenders.

7.4 Delivery Time (15%)

A higher than normal weighting has been assigned to the delivery schedule criterion within the evaluation process, affording preference to suppliers capable of expeditiously delivering items to Montserrat (CIF). The percentage for this criterion will be calculated proportionately to similar submissions from other tenders giving full marks to the bidder with the fastest total delivery.

7.5 Experience (15%)

Prospective bidders need to provide details of at least two (2) previous contracts completed within the past ten (10) years of a similar nature to the scope of works of this tender with a value of no less than EC$ 750,000 for material and labour or a minimum value of EC$150,000 for labour only. These details should include but are not limited to the following; the entity or person for which the work was completed, contact information for the entity or person, the value of the works, the location of the works. In addition, the

prospective bidders can submit award letters for works in lieu of the above-mentioned information. The percentage for this criterion will be calculated proportionately in comparison to other submissions from bidders.

Start Date or Date of Award	Description of Works	Name of Client	Price of Contract	Date Completed

7.6 Technical Specifications and Experience (15%)

The bidder with the best solution, while meeting the minimum technical specifications in Section 6, will be given preference. Bidders are encouraged to suggest alternative solutions to the required technical specs, but they must thoroughly justify their choices, highlighting the benefits of their suggestion compared to the specified technical specs. Marks will be awarded based on how well the proposal aligns with the technical specifications when compared with other bids.

7.7 Cost Proposal (35%)

Bidders must complete the Form of Tender (Section 8) and return it with their bid submission. The Bid price is a significant factor and the Government of Montserrat will seek to ensure that the services are undertaken at the most economically advantageous price. However, there are other factors which comprise the criterion and these will be considered proportionately. The Government of Montserrat is not bound to accept the lowest or any bid. The percentage for this criterion will be calculated proportionately in comparison to other price submissions from Bids. Bidders must submit all the documents requested in the ITT document. The ITT checklist provides a list of requirements which need to be fulfilled.

For example, if the cost element is worth 35%:

$$\text{Tenderer's Financial Score} = \frac{Lowest\ Tender\ Price}{Tenderer's\ Tender\ Price}\ x\ 35$$

Example: The lowest tender price received (Bidder A) is EC$ 10,000.00, and Bidder B submits a tender price of EC$ 14,000.00. The maximum score available for the financial proposal is 35 points.

$$\frac{EC\$\ 10{,}000.00}{EC\$\ 14{,}000.00}\ x\ 35 = Bidder\ B's\ Score$$

Results:

- Bidder A (lowest price: XCD 10,000) = 35 points
- Bidder B (price: XCD 14,000) = 25 points
