Clarifications and Responses

Project Title: Supply and Delivery of Pen 60/70 Bitumen BUILTE/INFRA/2026-27-14

Date: 28th October 2026

The following clarification request regarding the RFQ:

ITEM	Clarification	Response
1	Eligibility: the RFQ references "invited tenderers only." Please confirm whether uninvited suppliers may submit a quotation, and if so, how to register.	We confirm that this procurement opportunity is open to all bidders.
2	Density specification: please confirm the required density value and test method, as the stated figure appears inconsistent with standard Pen 60/70 specifications.	Design Bulk Density: 1.010 – 1.060 kg/m³ (ASTM D70/D70M – 21 pycnometer method).
3	Packaging and delivery: please confirm the required packaging (drums or bulk, container size), delivery point and Incoterm, and required delivery date.	Delivery Method: The 40 tons of bitumen must be delivered in insulated; bulk liquid bitumen containers (standard ISO bitumen tank container 20-foot long) equipped with functional heating systems (burners).

NB* All Bidders should refer the attached updated Specifications.
